Education

Plaksha University

Data Science, Economics and Business (DSEB)

Merit Scholarship Recipient

Relevant Coursework: Data Science Fundamentals, Machine Learning, Python Programming, Statistics, Business Analytics, Financial Markets

2024-Present

JCB School

JEE Main Percentile: 95.01 (PCM)

Shimla, Himachal Pradesh

2022-2023

Experience

Plaksha University

Data Science / Research

- Structured and drafted a 15–20 page DEI Impact Report; compiled and analysed metrics to create tables and visual summaries of key trends
- Synthesized multi-source stakeholder data; ensured accuracy and analytical rigor while developing narratives and case studies
- Transformed raw data into actionable insights; delivered a publication-ready report integrating analysis, storytelling, and visualization

Mohali, Punjab

March 2026 – April 2026

LEO Lab, Plaksha University

Incoming Data Science Research Intern

- Selected to work under the Head of DSEB on applied data science and research driven projects
- Selected to work on NLP-driven scraping and analysis of large-scale review data, extracting structured insights from unstructured text to study user/employee perception patterns and their real-world impact

Mohali, Punjab

June 2026 – July 2026

Projects

WORK CULTURE INDEX (WCI) – NLP & Analytics Project

Personal / Research Project |

2026

- Built NLP pipeline to analyse ~6,600+ employee reviews across 6 companies; used RoBERTa + VADER and engineered 5 theme-based scores
- Developed workplace culture index (0–100) using PCA + expert weights; validated robustness and found inverse relation with star ratings
- Deployed interactive [Streamlit](#) dashboard for insights, comparisons, and trend visualization

SOLAR IRRADIANCE PREDICTION – ML & DATA ENGINEERING PROJECT

Team / Research Project |

2026

- Built ML pipeline to predict solar irradiance across India using 2GB+ pollution, weather, and satellite data
- Integrated CPCB and ERA5 data via hourly geospatial–temporal merging; engineered features from pollution and atmospheric factors
- Processed NetCDF and tabular data (xarray, pandas) to create unified station × timestamp dataset for scalable energy modeling

PHARMA PERCEPTION TOOL – NLP & ANALYTICS PROJECT

Team / Research Project |

2025

- Built data-driven tool to analyze sentiment across 4,000+ medicines and 30,000+ user reviews; aggregated data from AskAPatient, WebMD, Drugs.com, PubMed, and social media
- Applied NLP to extract sentiment and identify gaps between user feedback and clinical insights; designed comparison module to benchmark drugs
- Developed interactive dashboard to deliver actionable insights for pharmaceutical decision-making

Achievements

- Secured 1st place in the FinTech Track at the DotSlash Hackathon (Plaksha University), competing in a 24-hour problem-solving environment; developed [CashMark](#), a supplier payment tracking and credit scoring platform, and was awarded ₹25,000 prize for innovation and execution.
- Won Best Design Track at Thapar University Designathon by conceptualizing and designing a premium OTT-style streaming platform; created high-fidelity Figma prototypes with AI-driven search and recommendation features, demonstrating strong UI/UX thinking and product ideation
- Co-authored and published an [article](#) in *The Morung Express*, critically analysing the psychological and behavioural impacts of meditation; translated academic research into an accessible narrative for a public audience

Skills

Technical: Python, ML (Scikit-learn), NLP, Pandas/NumPy, SQL, Streamlit, Statistics, APIs

Analytical: Model Evaluation, Time Series, Data Analysis, Feature Selection, Hypothesis Testing

Soft Skills: Problem Solving, Research, Data-Driven Thinking, Communication, Critical Thinking
