EDUCATION

BTech- Data Science, Economics & Business	Plaksha University , Punjab	8.13	2028
12th - CBSE	JCB School, Shimla	83.4%	2023
10th - CBSE	St. Edward's School, Shimla	87%	2021

EXPERIENCE

Research Intern Plaksha University	Mar 2026
- Structured a 15–20 page DEI Impact Report, compiling metrics from multiple stakeholder sources into tables and visual summaries - Synthesized multi-source data into key trend narratives and case studies, ensuring analytical accuracy and rigor throughout - Delivered a publication-ready report combining data analysis, storytelling, and visualization for organizational decision-making	
Data Science Research Intern LEO Lab, Plaksha University	June 2026- July 2026
- Merging employee review, financial, and stock data across 2,000+ companies for large-scale analysis - Building a unified multi-source dataset to analyze correlations between workplace culture and company performance - Extracting structured insights from unstructured review text to study employee perception at scale	

PROJECTS

Work Culture Index (WCI) - NLP & Analytics Project	April 2026
- Built an NLP pipeline scoring overall workplace culture (0–100) across 6,628 employee reviews from 6 firms - Engineered a custom RoBERTa + VADER sentiment ensemble model across 5 weighted culture themes - Deployed an interactive <u>Streamlit</u> dashboard revealing a clear inverse link between culture scores and star ratings	
Solar Irradiance Forecasting - ML & Data Engineering Project	Jan 2026 - May 2026
- Built an <u>LSTM model</u> predicting solar irradiance across India, achieving R² of 0.87 with MAE of 39.2 W/m² - Integrated CPCB pollution and ERA5 weather data via hourly geospatial-temporal merging across satellite data - Engineered a unified station × timestamp dataset merging pollution, weather, and satellite features for scalable energy modeling	
Gender Inequality In Healthcare Expenditure - Statistical Research Project	March 2026 - May 2026
- Analyzed <u>healthcare spending gaps</u> across 50,217 individuals using two-part hurdle models and gap decomposition methods. - Found women spend 4.8 - 7.1% less on care, with up to 48% of the gap unexplained by observable factors - Validated findings via multilevel modeling and 12 robustness checks, isolating public-facility bias as the key driver	
Drug Sentiment Analytics - NLP & Healthcare Analytics Project	January 2026
- Built a <u>sentiment platform analyzing</u> 30,000+ patient reviews across 4,000+ medicines from 5 sources - Found 27% of drugs had positive patient reviews despite the medical literature flagging safety concerns - Scraped multi-source review and literature data via automated pipelines (AskAPatient, WebMD, PubMed, X)	

SKILLS

- Programming Languages:** Python, C/C++, SQL
- Technologies:** Stata, Machine Learning, Selenium, Streamlit, APIs,Refinitiv Eikon

ACHIEVEMENTS/EXTRACURRICULARS

- Won 1st place in the FinTech Track at DotSlash Hackathon, Plaksha University, competing in a 24-hour problem-solving sprint. Built CashMark, a supplier payment tracking and credit scoring platform, earning a **₹25,000** prize for innovation and execution
- Won **Best Design** Track at Thapar University Designathon for a premium OTT-style streaming platform concept and design. Created high-fidelity Figma prototypes featuring AI-driven search and recommendation systems, showcasing product and UX thinking
- Co-authored and **published** an article in The Morung Express, analyzing the psychological and behavioural impacts of meditation. Translated academic research into an accessible narrative for a general public audience

POSITIONS OF RESPONSIBILITY

Member Kartavya (Community service Club)	Jan 2025 – Jan 2026
- Helped design outreach materials and branding for community sessions reaching underprivileged students in Punjab - Contributed to planning and execution of the brand kit, including logo, typography, and templates for consistent visual identity - Collaborated with Design team members to drive engagement and participation in events	
Member CYDEF (Cyber Defence Club)	Jan 2025 – April 2025
- Designed creatives and social media Campaigns for cybersecurity awareness , distributed campus-wide - Contributed to the planning and execution of club events alongside the design team
